For pre-washing, here is what is recommended:

- It is recommended that a new set of uniforms be laundered before wearing; in lukewarm (100 F) water using a mild detergent.
- Please let us know how the uniforms that were stained do today.

Here is more info for continued care and washing. This below info is sent with every order:

- **UNIFORMS:** should be laundered immediately after they have been worn. Color transfer (bleeding) may occur when in perspiration soaked garments are left in a pile or folded one on top of another for any period of time. Garments that cannot be laundered at once should be hung individually on rust-proof hangers (plastic or wooden). All items are not a part of the garment; i.e. belts, pads, etc., should be removed and laundered separately. As an extra precaution, wash one jersey/pant, inside out, if results are acceptable, proceed with the balance.

- **PRE-SOAKING:** Garments made of Antron Nylon or Spandex that are unusually soiled or stained can be pre-soaked in lukewarm (100 F) water with a pre-soak agent for no longer than one hour. Cold washing may cause color migration of acid dyes so we advise separating wet or damp uniforms.

- **WASHING:** Rinse washing machine before laundering garments. Most garments can be laundered and/or rinsed in lukewarm water (100 F). White and colored garments cannot be washed together, was separately by color. Use mild detergent (PH under 10), when used following instruction, produces good results.

- **Drying:** Garments should be air dried on rust-proof hangers (plastic or wooden). If machine drying is necessary, dryer should be at lowest temperature or “air-only” setting. Uncontrolled heat will result in uncontrolled shrinkage or damage to lettering of garments. Remove garments from dryer at completion of drying cycle.

- **DO NOT DRY CLEAN GARMENTS.** Dry cleaning may discolor and ruin imprint names and numbers.

- **DO NOT IRON OR PRESS GARMENT.**

- Dry garments completely before storing. Storing garments in a cool, dry area protected from sunlight and fluorescent light will prevent mildew or yellowing.
